CMS Web Hosting

Custom Website Template

Web Design Need Analysis:

We mail you a small web development questionnaire to understand your website design needs, about your business, your target market, web design preferences etc.

Web Design Proposal:

Based on your feedback we create proposal for your web design work, which talks about your web design details, timeline and delivery schedule

Creating Design concept:

Once we have understood your requirement we start, creating layout designs for your website. We create 2 to 3 layouts in which you need to choose one design on which we start the actual website design work

Web Design starts:

Once the final layout has been chosen by you, we start designing the website based on chosen design.

Web Design preview:

Once we have completed the website we launch your website on a temporary hosting server where you can see the developed work, you can suggest us if further modifications in text alignment, images etc but not in layout design as design gets freezed in layout phase.

Unlimited Updates

Heaving troubles for updating your website! Now you no need to worry about your website updates. We will do it for you. As per your chosen services and applications you want on your website. Some Other Paid Payment Getaways are also available to receive payments online.

CMS Designing And Developing

A content management system(CMS) is a method used to provide nearly complete control over content on the Web; everything from managing users, documents, various media, and a host of other things (depending on which CMS you use) is completely automated with an entire web structure including the page itself.

Aside from installing a CMS on your website's server, they are generally easy to use and can save a webmaster weeks worth of development time or just be used by individuals who know completely nothing about web development.

Some CMS Programs:

Joomla

Wordpress

Drupal

Mambo
